Powerdown220 Eliminating Electricity Overspend In The UK Dairy Industry

Powerdown220 are working alongside some of the major manufacturers in the Dairy Industry eliminating their electricity overspend saving them hundreds of thousands £££ every year by implementing Voltage Optimisation (VO) solutions on a site, head office and distribution level.

Dairy Case Study

- Annual Electricity Spend: £1,486,492
- Annual Energy Savings: £98,852
- Project Cost: £181,012
- Energy Reduction: £6.55%
- Harmful Emissions Reduction: 127,174KG
- Payback Time: 1.7 Years
- 10 Year Savings: £1.2 Million

In addition to saving Dairy Manufacturers hundreds of thousands £££ every year in eliminating electricity overspend, our VO technology also increases the lifespan of all their electrical equipment and appliances. Reducing incoming voltage also reduces harmful carbon emissions improving the carbon footprint of every Dairy manufacturer.
