Powerdown220 Eliminating Electricity Overspend In The Commercial Printing Industry

Powerdown220 are working alongside some of the major commercial printers eliminating their electricity overspend saving them hundreds of thousands £££ every year by implementing Voltage Optimisation (VO) solutions on a site, head office and distribution level.

Commercial Printer Case Study

- Annual Electricity Spend: £240,000.00
- Annual Energy Savings: £22,344.00
- Project Cost: £49,029.25
- Energy Reduction: £9.31%
- Harmful Emissions Reduction: 58,450 KG
- Payback Time: 2.2 Years
- 10 Year Savings: £278,281.92
- ROI: 45.6%

In addition to saving commercial printers hundreds of thousands £££ every year in eliminating electricity overspend, our VO technology also increases the lifespan of all their electrical equipment and appliances. Reducing incoming voltage also reduces harmful carbon emissions improving the carbon footprint of every commercial printer.
